PRIME BIZFest

Prime EMC is delighted organizer of the major event, Prime Bizfest. Prime Bizfest is a platform that helps make the dreams of entrepreneurs come true. It will walk you through the process of starting and growing your own company and teach you how to stay competitive and thrive in the business world. Students can use it as a platform to present their company concepts. A number of activities are planned for this event, such as networking sessions, workshops, panel discussions, startup pitches, and business plan competitions.

With great pride, Prime College's Prime Entrepreneurial Management Club (EMC) announces the overwhelming success of Prime BizFest 2024. Held from **Baisakh 9 to Baisakh 14 (April 21 to April 25, 2024),** this week-long event was a tribute to the club's commitment in encouraging entrepreneurship among future business leaders. Over the first five days, a series of sessions were carefully organized by the EMC. The goal of these courses was to provide participants with the fundamental understanding needed to successfully navigate the exciting world of business.

On the first day of Bizfest (April 21, 2024), EMC held 'Idea Ignition' workshop. The EMC understands how critical it is to inspire innovation. Participants embraced this program as a platform to develop and polish their company concepts into workable companies. On the second day (April 22, 2024), EMC held 'Financial Framework'. Any successful firm is built on the foundation of financial literacy. Through the clarification of financial concepts, participants were better equipped to budget their money and make wise financial decisions. On the third day (April 23, 2024), EMC held 'Operational Optics'. Running a firm smoothly is essential for its longevity. Participants completed this program with the knowledge and skills necessary to optimize efficiency and streamline operations.

On the fourth and fifth day (April 24 & 25, 2024), EMC held 'Market Mastery' and 'Scale-up Symposium'. The crucial initial phase for any entrepreneur is to understand their target market. This program helped participants connect with their potential clients by digging into market research methodologies and strategies. The ability to plan forward is what makes successful firms exceptional. Participants in this conference gained important knowledge about creating plans for growing their businesses and achieving long-term success. To guarantee that participants gained real-world experience and learned from industry best practices, the EMC arranged for seasoned mentors to attend these sessions.

The week wasn't only about workshops. The EMC hosted a captivating panel discussion titled **"WHY NEPAL"** on Baisakh 14. Esteemed business leaders like Mr. Anil Keshary Shah, Miss Zenisha Moktan, and Mr. Aabhushan Jyoti Kansakar shared their journeys and entrepreneurial wisdom. Moderated by Mr. Prabesh Adhikari, the discussion highlighted the potential and opportunities Nepal offers for aspiring entrepreneurs. The panelists' inspiring narratives served as a powerful motivator, igniting a renewed sense of entrepreneurial zeal in the audience.

The Prime Treasure Hunt is an exciting new feature that the EMC introduced this year. The participants' problem-solving abilities, teamwork, and business acumen were put to the test with this exciting mix of events. The EMC created the tasks to be thought-provoking and entertaining, covering Word Quest, Stack the Cup, Marketing Mastery, Operational Game, Sell the IPO and Scavenger Hunt. The top five teams emerging from these challenges earned the right to showcase their business ideas in the final pitching round. The last round marked the end of

the week's activities. Equipped with the knowledge acquired from the workshops and encouraged by the competition, the top five teams presented their creative startup concepts. Every pitch served as evidence of the participants' diligence and commitment. The EMC is honored to have given these aspiring business owners a stage on which to demonstrate their inventiveness and acumen.

Prime BizFest 2024 concluded on a high note with an Open Mic Night featuring the renowned comedian, Mr. Sujan Zimba. This event, organized by the EMC, provided a platform for lighthearted entertainment and networking, leaving a lasting impression on the audience. Prime EMC's greatest accomplishment is Prime BizFest 2024. The week-long program gave ambitious business owners the knowledge and resources they needed to succeed, acting as a starting point for their career. In the upcoming years, the club hopes to build on this success and make Prime BizFest an even bigger and more significant occasion.

Unlocking Potential:
Building a Supportive Ecosystem for Girls in ICT Leadership

Er. ROLISHA STHAPIT
Vice Principal - I.T. Programs

The Information and Communication Technology (ICT) sector is a dynamic force shaping our world. Yet, it suffers from a significant gender gap, with women vastly underrepresented in leadership positions. To truly harness the transformative power of ICT and foster inclusive growth, it is essential to construct a supportive ecosystem that empowers girls to excel in ICT leadership roles. The schools, communities, and industry stakeholders play a vital role in cultivating an enabling environment for girls in ICT.

Schools play a pivotal role in nurturing future leaders. Integrating ICT education into the curriculum at an early age is crucial. This should go beyond basic computer literacy and delve into areas like coding, problem-solving, and computational thinking. However, education alone is insufficient. We need to dismantle stereotypes surrounding STEM fields (Science, Technology, Engineering, and Mathematics) and create a culture where girls feel encouraged to explore ICT without fear of judgment. Moreover, providing mentorship programs and exposure to female role models in the ICT industry can inspire girls to envision themselves as future leaders in the field.

> *Each time a woman stands up for herself, without knowing it possibly, without claiming it, she stands up for all women*
>
> -Maya Angelou

Beyond the classroom, communities have a vital role to play. Community initiatives such as hackathons, coding boot camps, and tech workshops create inclusive spaces where girls can explore their interests, collaborate with peers, and refine their technical skills. Furthermore, establishing partnerships between schools, local businesses, and community organizations facilitates internships, job shadowing opportunities, and mentorship programs, enabling girls to gain real-world experience and insights into ICT careers. Industry stakeholders are responsible for shaping the ICT landscape and for fostering diversity and inclusion within their organizations.

By implementing gender-inclusive recruitment practices, offering equal opportunities for career advancement, and addressing workplace biases, companies can create an environment where girls feel valued and empowered to pursue leadership roles in ICT.

Industry-sponsored initiatives such as scholarships, mentorship programs, and leadership development workshops provide girls with the necessary support and resources to thrive in the competitive ICT industry. Furthermore, actively promoting female role models within the industry is essential. Highlighting the successes of women in ICT leadership positions serves as a powerful inspiration for girls, demonstrating the vast possibilities that await them.

Collaboration among schools, communities, and industry stakeholders is essential in creating a holistic ecosystem that empowers girls in ICT leadership. By aligning their efforts and resources, stakeholders can address systemic barriers, promote diversity and inclusion, and cultivate a pipeline of talented female leaders in the ICT sector. Moreover, fostering a culture of mentorship, support, and encouragement ensures that girls have the confidence and opportunities to reach their full potential in ICT leadership roles.

> *Women belong in all places where decisions are being made. It shouldn't be that women are the exception.*
>
> -Ruth Bader Ginsburg

Building a supportive ecosystem requires collaborative effort. Schools, communities, and industry stakeholders must work together to create a pipeline that empowers girls to pursue ICT leadership roles. By providing the necessary education, fostering a culture of encouragement, and offering practical opportunities, we can unlock the immense potential of girls in shaping the future of technology. This not only benefits the ICT sector but also leads to a more equitable and diverse workforce, driving innovation and progress for all.

Together, we can build a future where gender equality and diversity are integral to the success of technology-driven societies.

INTRA COLLEGE FIFA FIESTA

The recent 2-day intra-college FIFA tournament witnessed an exhilarating competition as 32 eager gamers gathered to showcase their skills and compete for the prestigious title of champion.

The tournament, which promised a grand cash prize and vouchers worth Rs. 5000, was structured into two groups, each featuring a series of intense 1v1 matches that kept participants and spectators on the edge of their seats.

Day One: Setting the Stage

The tournament kicked off with great enthusiasm on the first day. The 32 participants were split into two groups of 16, and the excitement was palpable as the knockout matches began. Each game was a high-stakes battle, with every player aiming to secure a spot in the quarterfinals.

The opening rounds saw a flurry of action. Players showcased their skills with stunning goals, tactical brilliance, and impressive defensive maneuvers. The nature of the knockout format meant that every match was a do-or-die scenario, adding an extra layer of intensity to the competition. Spectators were treated to thrilling encounters, including several upsets where underdogs triumphed over higher-speeded opponents. As the day progressed, the field of competitors was gradually whittled down. By the end of the day, the top eight players from each group had emerged, earning them places in the quarterfinals. These quarterfinalists had demonstrated exceptional skill and composure, setting the stage for even more gripping matches on the second day.

Day Two: The Road to Glory

The second day of the tournament began with an air of anticipation. The quarterfinals were set to determine the true contenders for the title, and the matches did not disappoint. Each quarterfinal was a showcase of strategic gameplay and technical prowess, with players leaving everything on the virtual pitch.

The first quarterfinal saw a dramatic showdown between two evenly matched competitors. After a tense 90 minutes, a last-minute goal secured victory for one player, sending him through to the semifinals. The second quarterfinal was a more one-sided affair, with a dominant performance resulting in a comfortable win. The third and fourth quarterfinals were equally captivating. Both matches went into extra time, and one was decided by a penalty shootout that separated the competitors. By the end of the quarterfinals, four players secured the spot to advance to the semifinals.

Semifinal Showdowns and the Grand Finale

Both semifinals were a true test of skill and mental fortitude. In the first semifinal, we saw a tense and tactical battle occur, with the decisive goal coming in the dying minutes, taking one player to the final. The second semifinal was a thrilling match. The match featured end-to-end action, with both players exchanging goals in a high- scoring affair. In the end, one player continued his remarkable run to the final. The grand finale was the highlight of the tournament, attracting a large and enthusiastic audience. The atmosphere was electric as the two finalists took to the virtual pitch. The match was a showcase of skill, strategy, and nerves of steel. Both players traded goals, but it was a brilliant solo effort in the final minutes that clinched the victory. The crowd erupted in applause, celebrating the new champion.

Conclusion

The two-day intra-college FIFA tournament was a resounding success, bringing together a community of gamers and enthusiasts in a celebration of talent and competition. The tournament not only provided a platform for showcasing FIFA skills but also fostered friendships and a sense of unity among students. As the event concluded, there was small scale anticipation for future editions, with everyone eager to witness more thrilling matches and discover new champions. The bar has been set high, and the Prime Esports Hub looks forward to the next chapter in this exciting

COLLEGE CHAMPION CONTEST

KHAALIsisi

Participating in the **National Green College Champion Contest** was an enlightening and transformative experience for us, Team Poshan from Prime College. Working together, we discovered the immense value of collaboration and the power of diverse perspectives. Each team member brought unique strengths and insights, which were crucial in shaping our project on sustainable nutrition.

The event, held in an ultramodern venue, was more than just a competition. It was a vibrant gathering of students, educators, and business leaders from across the country, all united by a shared passion for green innovation. The atmosphere was electric with anticipation and excitement, as we presented our ideas to marry economic success with environmental sustainability.

Winning the first runner-up position was a proud moment for us. It not only acknowledged our hard work but also emphasized the significance of our collective effort. This contest was a celebration of the potential of young minds to instigate change, underscoring the vital role that institutions like Prime -

College play in fostering Eco-conscious entrepreneurship.

Khaalisisi's initiative has instilled in us a sense of urgency and responsibility to integrate sustainable practices into our future ventures. The event was a powerful reminder that the future of business lies in practices that ensure not just economic prosperity but also the well-being of our planet.

Reflecting on our journey, we are inspired to continue advocating for sustainable business practices and are excited about our positive impact on the world.

Natasha Shrestha, BBM 7th semester

"Participating in this contest was an eye-opener for me. It wasn't just about winning; it was about learning and growing. The feedback from the judges and interactions with other teams provided invaluable insights that I will carry forward in my career."

Shreeshav Bir Pradhan, BBA 7th semester

"The entire experience was transformative. It pushed us to think beyond conventional business ideas and to consider the long-term impact of our actions on the environment. The camaraderie we built with fellow participants was incredible, and it's encouraging to see so many young people passionate about sustainability."

Bishal B.R. Devkota, BBA 7th semester

"Working as a team, we learned the importance of collaboration and the power of diverse perspectives. Each of us brought something unique to the table, and that synergy was crucial in developing our project. Winning the first runner-up was a proud moment for us and a testament to our collective effort."

STUDENT SPOTLIGHT

Sumir Bhandari
BCA 8th semester

"

As I reflect on my academic journey at Prime College, pursuing Bachelor of Computer Applications (BCA), it feels like an exhilarating expedition, filled with both challenges and opportunities for growth. From the very first semester, Prime College has proven to be an exceptional resource for learning about technology. Renowned for its comprehensive computer applications program, the institution has exceeded my expectations. The BCA program at Prime has honed my problem-solving skills and instilled in me a confident and proactive mindset, overcoming initial reservations, and shaping me into a more capable leader.

Presenting my project at the showcase event and receiving positive feedback was a pivotal moment. Additionally, participating in sports during Sports Week and performing on stage during the college farewell program added valuable experiences to my college life. Prime College's emphasis on student success and connecting students with job opportunities is evident through its diverse range of workshops, events, and seminars. Participation in the Django workshop, for instance, significantly bolstered my Python proficiency.

As I strive to become a full stack developer, I am committed to continuous learning and growth in the field. My fascination with computers stems from their ability to solve real-world problems. I am passionate about leveraging technology for meaningful impact.

I extend sincere gratitude to all the teachers and staff members at Prime, especially coordinator of BCA Ms. Rolisha Sthapit, whose unwavering support and mentorship have been invaluable throughout my time here. As I reflect on my journey thus far, I am grateful for the opportunities and experiences that have shaped me, and I eagerly anticipate the continued growth and innovation that lie ahead in the realm of computer applications.

Prime Futsal League Season 2080/81
Celebrating Champions and Sportsmanship

Winners: BSc. CSIT 2077 Batch

The Prime Futsal League Season 2080/81 was nothing short of epic. Twenty teams from all faculty of Prime College, each with their own unique skills and spirit, battled it out on the futsal court with a spirit of sportsmanship. It was more than just a tournament; it was a celebration of teamwork and the joy of the game.

The league kicked off with an air of excitement. Teams were divided into two groups, setting the stage for some intense matches. Every game was a chance for players to display their talent and passion for futsal. From dazzling goals to heart-stopping saves, each moment was filled with energy and excitement.

But the real magic happened in the knockout stage. With the stakes higher than ever, teams brought their A-game to the court. And in the end, it was BSc. CSIT 2077 Batch who emerged victorious, lifting the championship trophy with pride. Their journey was one of determination and teamwork, inspiring us all.

BBS 2076 Batch fought tooth and nail to claim the runner-up position. Their resilience and sportsmanship were truly -

> **Best Player** - Ajit Dhital
>
> **Best Goalkeeper** - Bikesh Maharjan

commendable, reminding us that in futsal, it is not just about winning—it is about the love of the game and the bonds we create along the way.

A special round of applause for the outstanding efforts of our organizing team, the talented members of BIM 2076 Batch. Here is to the champions, the runners-up, and every player who stepped onto the court with a dream in their heart.

The Prime Futsal League Season 2080/81 may have ended, but the memories and friendships made will last a lifetime. Until next time, keep kicking, keep scoring, and never forget the true spirit of futsal!

ORGANIZERS: BIM 2076 Batch- Arun Jung Shahi, Bibek Shakya, Kushal Narayan Shrestha, Luchhen Lama, Mandeep Giri, Sailesh Nepal, Sanush Shakya, Sarvesh Dhakal, and Saurav Sen.

Unlocking the Power of Collaboration
Workshop on Git and GitHub

On a bright morning, the Prime IT Club brought together 43 enthusiastic students for an enlightening one-day workshop on "Getting Started with Git and GitHub". The event was a success, conducted by the knowledgeable Basanta Rai, an Associate Software Engineer at Amnil Technologies with expertise in Node.js, PHP, and Git. The purpose of this workshop was to introduce participants to the powerful tools of Git and GitHub, essential for modern software development and collaboration.

The workshop kicked off with an introduction to Basanta Rai, whose experience and skills immediately engaged the audience. He began by outlining the significance of Git and GitHub in the realm of software development. Git, a popular version control system, allows developers to manage and track different versions of their code efficiently whereas GitHub is a hosting service based on Git that facilitates collaboration and storage of software projects, making it indispensable for team-based development.

The session dived into the practical aspects of installing Git and GitHub on participants' devices.

This hands-on approach ensured that every student could follow along and apply the knowledge in real-time. Once the installation was complete, the participants created their GitHub accounts, setting the stage for deeper engagement with the platform.

The facilitator then introduced the students to a variety of Git commands and the extensive manual that Git offers. This segment was highly interactive, with Basanta sir addressing individual queries and providing personalized assistance. The workshop emphasized the basics of Git, particularly focusing on how to use it within a group or organization.The seamless integration of Git with GitHub as a communication and collaboration tool was a highlight, showcasing its potential in real-world applications.

The core of the workshop focused on five fundamental Git commands. Basanta sir explained these commands in detail, ensuring that participants understood their syntax and functionality.

This comprehensive explanation was crucial as these commands are the backbone of using Git effectively. He demonstrated the collaborative features of GitHub, showing how multiple users can work on the same project, share code, and track changes seamlessly.

As the session drew to a close, Basanta sir addressed various bugs and errors encountered by the participants, offering solutions and further clarifying doubts. This personalized guidance ensured that everyone left with a clear understanding of how to navigate and troubleshoot within Git and GitHub.

Overall, the workshop was a resounding success. Participants, mostly from CSIT 5th and BIM 5th, gained valuable insights and practical knowledge about Git and GitHub. This newfound expertise will undoubtedly benefit them in their academic and professional endeavors, equipping them with the tools to collaborate effectively in the ever-evolving field of software development.

In conclusion, Prime IT Club's workshop on Git and GitHub was a well-organized and impactful event, fostering a spirit of collaboration and continuous learning among future software developers. The hands-on experience and expert guidance provided by Basanta sir made this workshop an unforgettable and invaluable experience for all attendees.

Three Days Graphic Designing Workshop

In an era where visual storytelling is paramount, Prime IT Club hosted a comprehensive three-day "Graphic Designing Workshop", aimed at equipping participants with essential skills and knowledge in graphic design. Held at Prime College from May 16th to 18th and facilitated by Saugat KC and Shashank Singh, the workshop combined theoretical lectures with practical sessions to help 13 dedicated students create compelling visual content. The event covered various aspects of graphic design, including software tools, design principles, and practical applications.

The workshop commenced with an insightful introduction to the world of graphic design. Facilitators Saugat KC and Shashank Singh began by explaining the fundamental principles of design, such as balance, contrast, alignment, repetition, and proximity. This foundational knowledge is crucial for creating visually appealing and effective designs. The participants were introduced to the importance of these principles in crafting compelling visual narratives.

The second day was dedicated to mastering essential graphic design software. The focus was primarily on Adobe Photoshop and Illustrator, two industry-standard tools that are indispensable for any graphic designer. The facilitators provided detailed tutorials on navigating these programs, highlighting key functions and features.

The final day of the workshop delved into advanced graphic design techniques, pushing participants to refine their creative skills further. This session covered more sophisticated methods and practices that help enhance the quality and impact of their designs. An important component of this day was portfolio development, where students learned how to curate and present their work professionally—a critical step for aspiring graphic designers. The workshop concluded with a feedback and Q&A session, providing personalized critiques and answers to specific questions, ensuring that each participant received tailored advice to improve their work.

The Graphics Designing Workshop by Prime IT Club was a resounding success, providing a thorough and engaging introduction to graphic design. The blend of theoretical knowledge and hands-on practice ensured that participants developed a well-rounded skill set, essential for both academic and professional pursuits in the field of design. Facilitators Saugat KC and Shashank Singh played a pivotal role in creating an environment of learning and creativity, offering expert instruction and personalized support throughout the workshop.

ACCOUNTING BOOTCAMP

A Transformative Experience

7th Jestha, 2081

As a bachelor student, participating in the Accounting Bootcamp workshop was a game-changer. This 12-day intensive program, packed with knowledge and practical experience, has significantly shaped my understanding of the accounting world and my career aspirations.

From the outset, the boot camp promised to be an immersive experience and each day was meticulously structured to build upon the earlier day's learnings, ensuring a coherent and comprehensive understanding of accounting principles. One of the highlights was the hands-on approach to learning. We actively participated in various activities that mirrored real-world accounting scenarios. From preparing financial statements to performing audits and analyzing financial data, the practical exercises were both challenging and rewarding. The boot camp also emphasized the importance of technology in modern accounting. We were introduced to various accounting software and tools i.e., Tally Prime, learning how to leverage these technologies to enhance efficiency and accuracy in financial reporting. This exposure was particularly beneficial, as it bridged the gap between theoretical knowledge and practical application.

Networking was another significant aspect of the boot camp. Interacting with fellow participants, who were equally passionate about accounting, created a collaborative learning environment. Additionally, guest speakers from top accounting firms provided insights into industry trends and career opportunities, broadening our perspectives, and inspiring us to aim higher.

Reflecting on the past 12 days, I can confidently say that the Accounting Bootcamp has been a transformative experience. It has not only deepened my understanding of accounting principles but also equipped me with practical skills and a professional mindset. I am now more confident in my abilities and excited about the future opportunities in the accounting field.

Rojita Ghimire
BBM 5th semester

FACULTY
SPOTLIGHT

DIVAS SHRESTHA
Faculty member

How do you introduce yourself as one of the faculty members of Prime College?

Hello everyone! I am Divas Shrestha, a full-time faculty member at Prime College. I have the pleasure of teaching Accountancy and Taxation in various undergraduate programs and contributing to the academic and personal growth of our students.

In your opinion, what is the best quality of Prime College?

Prime College is renowned for several qualities that distinguish it as a premier educational institution. Among these, the best quality is its commitment to providing a holistic and high-quality education, which not only prioritizes academic excellence but also focuses on practical skills, personal growth, and social responsibility. This comprehensive educational philosophy ensures that students are well-rounded, competent, and ready to face the challenges of the modern world.

How has your teaching career helped you grow?

Teaching in college has been an enriching transformative experience that has significantly contributed to my personal and professional growth. It has groomed me in multiple dimensions, helping me to become a more effective educator and a well-rounded individual. I've learned to articulate complex ideas in ways that are accessible to students with varying levels of understanding which has proven invaluable to me in both professional and personal interactions.

How has Prime College changed since the day you joined?

Reflecting on my journey at Prime College, I've observed several significant differences between when I first joined and the current days. Contrary to the traditional teaching methods and paper based administrative procedures, our college, today, has fully embraced digital transformation and working towards implementing paperless administration. There is a vibrant culture of student engagement, with numerous clubs, societies, sports teams, and cultural events. Students are encouraged to participate in various activities that promote personal development, leadership, and teamwork. The infrastructure has undergone substantial improvements providing a conducive learning environment for students and faculty. These changes highlight the institution's growth and evolution over time.

Share your experience about one fun moment you had during the outings with your colleagues.

Certainly! Reminiscing about the outings with my colleagues from Prime College brings back some wonderful memories. A particularly unforgettable outing was our staff picnic at Purna Museum Resort, Jharuwarasi, Lalitpur on May 1st. It was a delightful picnic to celebrate our bond and create beautiful memories together. It was a more relaxed outing where we all enjoyed together. We took several pictures, hiked up to the nearby Santaneshwar Mahadev Temple and Bajrabarahi temple. Game of Bingo was the highlight although I won no prize! The relaxed environment and delicious food made for a perfect day of bonding. This outing has not only strengthened our professional relationships but also created lasting bonds and a sense of camaraderie and was instrumental in building a strong sense of community and teamwork among us.

Can you give an insight into the bond you share with the other colleagues of Prime College?

Can you give an insight into the bond you share with the other colleagues of Prime College?

The bond I share with my colleagues at Prime College is a blend of professional respect, personal friendship, mutual support, and cultural appreciation. It is a dynamic and evolving relationship that has enriched my professional journey and personal life. We learn from each other through informal discussions, workshops, and collaborative projects. This peer learning environment has been instrumental in our continuous professional development.

We celebrate each other's achievements, birthdays, and special occasions, creating a positive and joyful work atmosphere. These celebrations have helped us build a strong sense of community.

What has been your proudest moment at Prime?

There have been numerous moments of pride, but one stands out distinctly as the proudest. Me, along with my other colleagues who have completed more than 10 years of service were recognized and awarded in a ceremony. This moment encapsulates not only my personal achievement but also the collective success of my students, colleagues, family and friends.

What were the obstacles you faced in your teaching career?

I've encountered several obstacles throughout my teaching career which have provided valuable lessons and growth opportunities. One of the earliest challenges was addressing the diverse learning styles and paces of students. Not all students grasp concepts in the same way or at the same speed, making it difficult to ensure everyone was on the same page. Keeping students consistently engaged, especially in large classes or with subjects like Accountancy, which is perceived as one of the toughest and least interesting by the students, is a recurring challenge.

Handling classroom dynamics and maintaining discipline with careful management, ensuring fair assessment of students with diverse learning abilities, adapting to curriculum changes are perennial problems which, I think is faced by all the educators, not only me. . Each challenge has strengthened my skills, deepened my commitment to education, and enhanced my ability to adapt and innovate.

Is there anyone who you consider truly inspiring? If yes, who is it?
Yes, there are many great personalities who I consider truly inspiring. But if I were to mention someone whom I have taken great inspiration from, it must be the teachings of Shivapuri Baba. His life and teachings remind me of the importance of simplicity, discipline, inner peace, and universal compassion. His example shows us that a life dedicated to these principles can lead to profound wisdom and fulfillment. The writings and discourses of Jiddu Krishnamurti are also deeply inspiring to me.

What sort of advice would you like to give to your students who are facing problems in adopting the subject matter?
Adopting the subject matter can be challenging, but with the right strategies and growth mindset, it is entirely achievable. Remember that you are not alone in this journey; utilize the resources and support systems available at college. Stay persistent, proactive, and positive, and you will find that the subject matter becomes more manageable and even enjoyable.
Engage with the material actively. Instead of passively reading or listening, take notes, ask questions, and participate in discussions. Establish a regular and consistent study schedule. Don't hesitate to ask for help from your instructors. Join or form study groups with classmates. Regularly review your notes to reinforce learning and identify areas that need further clarification. Use educational apps and tools that can aid in understanding and retaining information about the subject matter.

> **"**

FUN , GAMES AND LASTING MEMORY FOR SEE STUDENTS

Prime Edutainment Program 2081

9th Jestha, 2081

As a part of Prime Edutainment Program 2081, Prime EMC recently organized an engaging and lively event at Prime Global School to celebrate the graduating SEE students. This special gathering featured two fun-filled games: Physical Tic Tac Toe and Scissor Paper Rock, providing an excellent opportunity for graduates to bond, create lasting memories, and celebrate their achievements.

Forty passionate students took part in the event, adding to the competitive and energetic environment. To assess the strategic thinking, reflexes, and coordination of the teams, students played a game called Physical Tic Tac Toe in which they physically put markers on a wide ground grid. Scissor Paper Rock encouraged children to compete by throwing them against one another in quick rounds. Winners progressed until a single champion was declared.

An amazing comeback in Physical Tic Tac Toe, where a team's coordinated work and excitement resulted in a thrilling victory, was one of the event's highlights. The audience cheered as the final two participants squared off, setting off a peak moment in the intensity of the game Scissor Paper Rock. The winner's celebration was met with cheers and laughter, which marked the end of a thrilling day. This graduation celebration's success has created a favorable precedent for upcoming events.
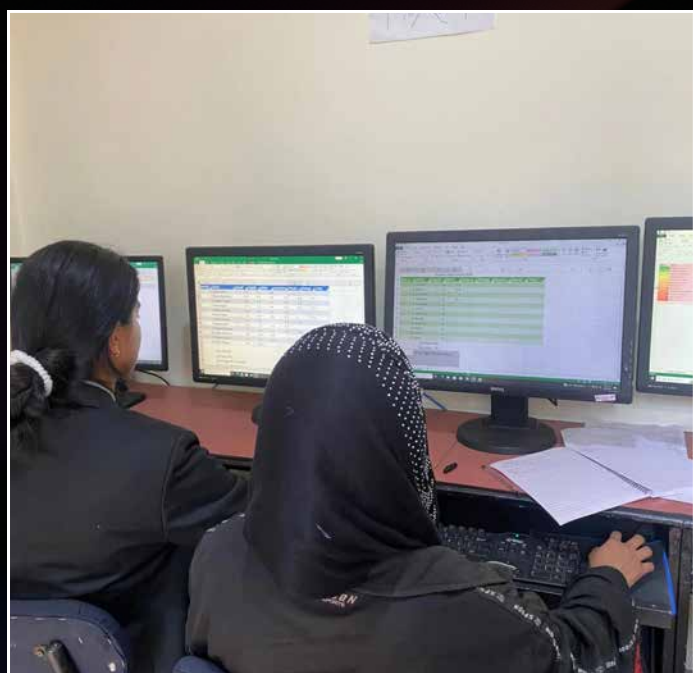

Empowering Girls through Tech:

The MS Office Workshop Journey

As one of the facilitators at the recent MS Office workshop, I'm excited to share the amazing journey we had with these incredible girls. In today's digital world, being tech-savvy is no longer a luxury but a necessity. However, not everyone has equal access to learning opportunities, especially young girls who are often underrepresented in the tech industry. Recognizing this gap, **Prime IT Club**, in collaboration with Voices of Women Media, recently organized a 6-day workshop aimed at empowering 11th-grade girls of Kanya Mandir School with vital MS Office skills.
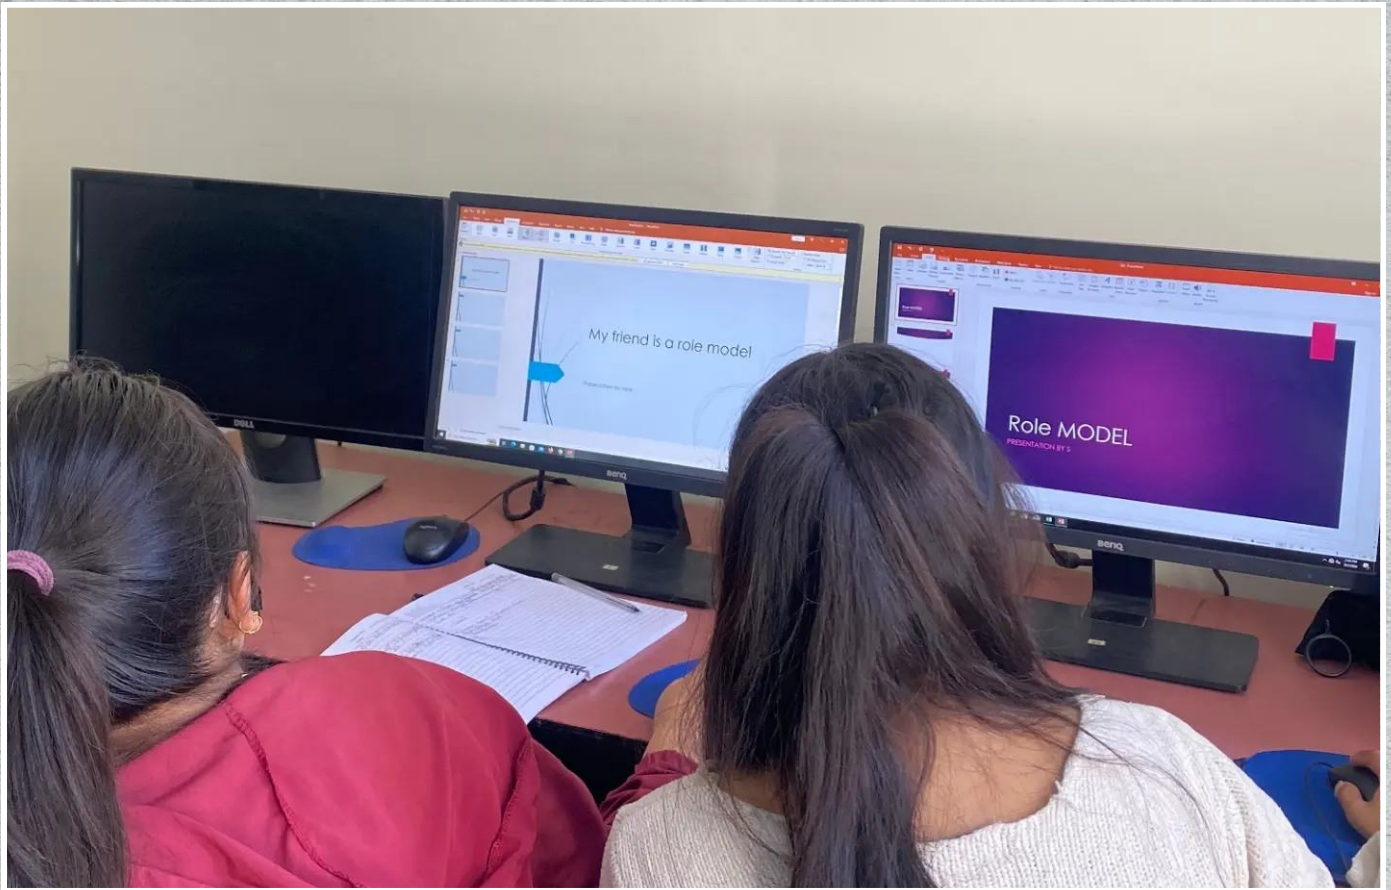

From the very beginning, our mission was clear: to equip these young girls with the essential MS Office skills necessary to thrive in a technology-driven world. We kicked off our journey with an exploration of Microsoft Word, where participants delved into the world of formatting tools and design elements while crafting beautiful newsletters that reflected their unique voices. It was extremely uplifting to watch their imagination come to life.

As the workshop progressed, we navigated through the intricacies of Excel, learning spreadsheet basics and even venturing into the realm of family budgets. Watching these girls tackle complex calculations with precision and finesse was truly awe-inspiring.

But the journey didn't end there. We then delved into the world of PowerPoint, where the girls polished their presentation skills. We watched as they made creativity run through captivating slideshows describing why they aspired to be like their role models. And let's not forget about the artistic flair of MS Paint, where digital artistry flourished in vibrant colors and imaginative designs.

Each day brought new challenges and new opportunities for growth. The feedback we received from our participants was overwhelmingly positive, echoing sentiments of increased confidence, readiness to embrace technology, and a newfound sense of empowerment.

Reading this feedback from the girls, my co-instructor, Nirjala Shakya, and I knew these six days had been significant and felt a sense of fulfillment knowing that we had made a positive difference in their lives. Witnessing their growth and newfound confidence over six days was inspiring. This experience reaffirms our commitment to gender equality in tech and leaves us excited for the bright futures these girls will create.

Reflecting on the success of our workshop, one thing is abundantly clear – the journey towards gender equality in the tech industry is well underway. Through education, opportunity, and mentorship, we are paving the way for a future where every aspiring technologist, regardless of gender, can thrive and succeed.

HTML CSS SESSION

13th Jestha, 2081

"Hello! I'm **Ayush Shrestha**, and I have a deep passion for teaching web development. I've dedicated myself to mastering and instructing in the major fundamental technologies of web development."

HTML (Hyper Text Markup Language) is the backbone of any web page; structuring content with its powerful tags and attributes. It transforms plain text into engaging elements like headings, paragraphs, and links. CSS (Cascading Style Sheets) takes this content

Ayush Shrestha
BIM 7th semester

and breathes life into it enhancing the visual appeal through meticulous control over layout, colors, and fonts. It's what turns a basic structure into a stunning user experience. JavaScript, the magic behind the scenes, brings interactivity and dynamism to web pages. It allows for real-time content updates, form validation, and captivating features like image sliders without needing to reload the page.

Together, these technologies are the pillars of modern web development, enabling the creation of responsive, engaging, and visually captivating websites. Mastering HTML, CSS, and JavaScript is essential for anyone aspiring to craft effective and appealing web applications. My mission is to guide others through this journey, sharing the excitement and satisfaction that comes from building the web from scratch. In this session, I've tried to do the same. I provided all the necessary information and techniques to the audience regarding the topic. All the terms were serially introduced with its practical application. They were guided to craft effective and alluring web applications.

ADVICE FROM FACULTY

"Knowledge is crucial as it shapes your thinking, personality, and attitude. It guides your actions in a specific direction. One should always strive to upgrade oneself by seizing opportunities to learn."

- Rupendra Gopali (Vice Principal-Management Programs)

"In life, many unforeseen situations may arise that challenge our expectations. It is essential to cultivate patience and remain prepared for such moments. In today's fast-paced world, patience serves as a crucial virtue that unlocks numerous opportunities."

- Bibek Acharya (Faculty Member)

"Today's generation is extremely competitive. To succeed in life, one must be knowledgeable about a wide range of things. Education is one of them, but just being educated will not get you anywhere. Mental fortitude is essential for dealing with life's challenges. Being on a straight path alongside a thousand other people is a safe choice, but it will not help you grow. Dare to be different, unleash your creativity, and gain a fresh perspective on life. Remember to respect people and their ideas."

- Dr. Sailesh Karmacharya (Research Coordinator)

ADVICE FROM FACULTY

"Never giving up is the symbol of success. Persistence in the face of challenges demonstrates true strength and resilience. Those who continue to strive, despite setbacks, ultimately achieve their goals. "

- Er. Sravan Ghimire (Faculty Member)

"Draw a crazy picture, Write a nutty poem, Sing a mumble-gumble song, Whistle through your comb. Do a loony-goony dance, 'Cross the kitchen floor, Put something silly in the world .That ain't been there before. I bet these words of Shel Silverstein in fact sums up our lives. In this hustle-bustle called life, don't forget to enjoy the little sunshine you get. Make the most of every moment and leave your mark!"

- Edna Shrestha (Faculty Member)

"Every mistake you make is progress. Each time you fall short, you're gaining valuable experience and insight. Don't be afraid to make mistakes, because that's where the real learning happens. "

- Er. Sharat Maharjan (Faculty Member)

NAVIGATING THE EMOTIONAL GROWTH

Social and Emotional Learning Workshop

" **27th - 32nd Jestha, 2081**

Recently, I had the privilege of attending a transformative five day Social and Emotional Learning (SEL) workshop, organized by the ESO department in collaborating with VAAV Wellbeing. As a 7th semester BIM student, this experience was profoundly impactful, focusing on crucial aspects of psychosocial development and essential life skills. The workshop included sessions on the "Rivers of Life", "Cognitive Distortions", "Control, Acceptance and Influence (CIA) model" and "Activating Events, Beliefs and Consequences (ABC) model", each offering the unique insights and practical strategies for personal growth.

This five-day session allowed me to visualize my life journey, reflecting on significant events and their influence on my current self. This activity, coupled with an in-depth exploration helped me identify and challenge irrational thought patterns, fostering healthier mindset. It has provided a practical framework for managing life's challenges, teaching me to focus on what I can control, accept what I cannot, and influence where possible.

The workshop culminated in a profound session titled "Unraveling Myself", where I integrated the concepts learned into a cohesive understanding of my emotional and social self. The SEL workshop has not only reshaped my self-awareness but also enriched my interpersonal relationships, making it an invaluable part of my academic and personal journey.

BIM 7th semester

ALUMNI SPOTLIGHT

-Ashish Shakya
BIM, 2014 Batch

1. To start, how would you like to introduce yourself?

Hello, I am **Ashish Shakya**, from the batch of 2014 BIM (Bachelors in Information Management) at Prime College. Currently, I am working as a Software Engineer at Proshore Nepal. Talking about my professional experience, I have been working in the IT field for 6 years.

2. What initially sparked your interest in pursuing a career in software engineering?

My interest in software engineering was sparked by a fascination with technology and a desire to solve problems creatively through coding. It initially started with developing a small basic registration application which i had built for an event for our college's club, Prime EMC (Entrepreneurial Management Club). Also, various discussions and events in ICT Meet Up really inspired me to work in the IT field.

3. As a working professional, what are some misconceptions about the work culture that you have encountered?

As a working professional, some misconceptions about the work culture that I have encountered include the belief that long hours always mean higher productivity, that remote work reduces collaboration, and that IT professionals do not have life.

4. Can you share memorable projects that you worked on or moments in your career that you are proud of?

The current project I am working on is a multi-tenant application built for targeted real estate businesses, based on a client from the Netherlands. Since it is a private application, I am sorry, but I cannot expose its end URL for public view.

5. What advice would you offer to current students for the transition from "college" life to "real" life?

Resources like YouTube, Udemy, Plural Sight are great sites for learning. If you want to pursue your career in the IT field, please use these resources wisely. Basic knowledge from these sources will aid a lot when trying to get an internship program in any sector to start your career.

6. What are some obstacles you faced in your career journey, and how did you overcome them?

Some obstacles I faced in my career journey include staying updated with rapidly changing technologies, dealing with complex debugging issues, and managing tight project deadlines. I overcame these challenges by continuously learning through online courses and tutorials, collaborating with experienced colleagues to troubleshoot problems, and improving my time management and organizational skills to handle multiple tasks efficiently.

7. How did the education and experiences at Prime College prepare you for the challenges in your career?

The education and extracurricular activities were always the highlights of Prime College. In the third and fourth semesters of my bachelor's degree, there was a teacher named Deepak Dharel, who taught us PHP language. I was really inspired by the way he taught us and gave us coding tasks. Personally, I learned a lot from him, and my interest gradually started growing in PHP.

8. Did you have any mentors or peers at Prime College who significantly influenced your journey? If so, how?

As I mentioned, Deepak Sir and his way of teaching and conveying his points were great. With his guidance, I initially built a simple registration system, which helped gather information from attendees for an event organized by the EMC club. It was my small initial step to build an application based on the requirements and needs then. This small application was an initial step to start my journey and sparked my interest in the field of IT.

9. Lastly, can you share a favorite memory from Prime College that still brings a smile to your face?

Reflecting on the annual trips always brings a smile, as they really created some of the best and cherished memories.

SHE LEADS
"Inspiring Journey of Wonder Women"
16th Asadh, 2081

The **Prime Entrepreneurial Management Club** proudly presented "She Leads: Inspiring Journey of Wonder Women" on **June 30, 2024,** at the Prime College Seminar Hall. This empowering event aimed to inspire future leaders through the incredible stories of seven remarkable women. **Miss Nepal 2018 Shrinkhala Khatiwada,** founder of Gatha, shared her visionary journey and the struggles of womanhood. **Zenisha Moktan, Miss Nepal 2009** and Retail Director at IMS Group, delved into her branding journey and experiences. **Pranayana KC, co-founder and CEO of Hivelaya,** recounted her transformative story of studying abroad, overcoming struggles, and building her own business.

The event also featured four in-house speakers with compelling stories. Sushma Maharjan, Principal of Prime Global School, discussed her journey from a tuition teacher to principal, emphasizing the importance of embracing opportunities. Barsha Manandhar, CEO of Dhago Ko Chura, talked about starting her business from scratch and her entrepreneurial challenges. Samikshya Giri, a BSc.CSIT student, shared how she overcame judgment and built her confidence. Shraya Shrestha, a BBA student, explored the "5 Chambers of Womanhood," offering unique insights into the different aspects of being a woman.

The event conducted and volunteered primarily by the female members of EMC was centered on empowerment and inspiration for women. It concluded with attendees feeling passionate, empowered, and empathetic, driven by stories of perseverance and success. The focus wasn't solely on celebrating achievements but also on encouraging future leaders to pursue their dreams. It was a day of celebrating extraordinary women's accomplishments and inspiring others to lead. Attendees left feeling connected, motivated, and ready to make a positive impact on the world.

अगाडि बढ

नरोक आफ्नो पाइलालाई,
अगाडी चाल्दै गर।
नहेर पछाडी,
अघि बढ्दै गर।।

नसोच दुखको बारे,
त्यसपछि त सुख आउँछ।
हासिराख मन्द मुस्कान लिएर,
तिमीलाई त्यहि सुहाउछँ।।

नसम्झ त्यो मान्छेलाई,
जसलाई तिम्रो पर्वाहि छैन।
मेहेनत गर्दै गर,
साथ दिने मान्छे नपाउने होइन।।

जे भयो बिर्सिदेउ भूतकालमा,
जिउ आफ्नो जिन्दगी,
चिन्ता नलिई भविष्यको,
अनि वर्तमान कालमा।।

नखोज तिमि खुशी अरुमा,
खुशी तिमि आफैंमा छ।
जिउ जिन्दगि खुलेर,
यो समय फेरी कहिले आउँछ।।

KANCHANJUNGA BASE CAMP
A HIMALAYAN ADVENTURE

The Kanchanjunga Base Camp trek in the Eastern Himalayas is an exhilarating journey that offers unparalleled views, rich cultural experiences, and the chance to explore one of the most remote regions of Nepal. Starting from Taplejung, the trek begins with a scenic drive from Kathmandu to Bhadrapur. This adventure takes you through diverse landscapes, from lush rhododendron forests to high-altitude terrains, offering stunning views of towering peaks like Jannu, Kabru, and Kanchanjunga. As trekkers ascend, they pass through the Kanchenjunga Conservation Area, encountering red pandas, snow leopards, and various bird species, adding to the trek's scenic beauty.

The Kanchanjunga region is inhabited by several ethnic communities, including the Rai, Limbu, and Sherpa people. This trek provides a unique opportunity to experience the rich cultural heritage of these communities. Trekkers pass through traditional villages, interact with locals, visit monasteries, and witness traditional farming practices. The warm hospitality of the local people is a highlight, offering a deep cultural immersion. The journey to the Kanchanjunga Base Camp is challenging, typically taking around 20 to 25 days (about 3 and a half weeks), but the awe-inspiring views of Kanchanjunga and its surrounding peaks make every step worthwhile.

For those planning the trek, physical preparation and proper acclimatization are crucial to avoid altitude sickness. Essential gear includes sturdy trekking boots, warm clothing, a good-quality sleeping bag, and trekking poles. Trekkers need to obtain several permits, including the Kanchenjunga Conservation Area Permit (KCAP) and a special trekking permit from the Nepal Tourism Board. The best time to undertake this trek is during the spring (March to May) and autumn (September to November) seasons, offering clear skies and moderate temperatures. The Kanchanjunga Base Camp trek is an unforgettable adventure, combining physical challenge, natural beauty, and cultural immersion, leaving trekkers with memories that last a lifetime.

BIM 7th semester

IS THAT YOU ?

Is that you trying to impress others, doing things you don't want? Hiding yourself behind your smiles, assuming you are not good enough. Shaping yourself by the ways others define you. Thinking you are the only one making mistakes.

If that is you, then stop! Stop trying to impress others. Stop trying to do what others want. Stop those fake smiles and understand yourself. The MAIN CHARACTER of your life is YOU. Trying to know yourself is what matters. Understanding your true colors is a need rather than defining them based on others' opinion. Life is precious and so are you. It is fine to be demotivated at times but devaluing yourself is not an option. There are paths you have never tried and ways you have never heard of. But that does not mean it is a dead end. It is just a starting point to know yourself. It is the point where you will see the image of 'A STRONGER YOU.'

Luniva Gorkhali
BBA 4th Semester

WHERE DO I GO NOW?

The cobblestone I paved are starting to crack,
And it's all coming down to crumbles.
The road I took, less travelled by,
Lead me to a dead end.
Where do I go now?

I promised myself I'd not sleep,
For there are miles to go.
For the pavement is still so cold.
I don't see the light,
And the tunnel is about to end.

In fact, the deeper I get in this labyrinth,
The darker it gets.
The road is all bumpy and the sidewalks are untrimmed.
My heart tells me go a little deeper,
But I want to get out of this maze.

Choose the road not taken,
As the pavements are clean,
As the slates are clean.
The pavements won't crush my bone
If I fall asleep.

Aayushree Pradhan
BBA 4th semester

Time's Torment

I don't like waiting.
It makes each moment feel like eternity.
As if the clock stopped ticking.
I hate it so much that I've become an expert in its agony.

I've grown sick of it,
Yet I'm still tethered to the hope,
like a lone flower clinging to life in a harsh desert.
Clinging on to the hope that they might return.
And put an end to this eternal suffering.
Oh how I wish for it to be reality,
how I wish the clock to start ticking again,
that is but an unattainable dream.
I'm stuck in this eternal cycle,
with no choice but to keep on waiting.
I truly have become the best at it.

Yet still,
I hate waiting.

EVERY KICK COUNTS
My Footballing Path

JOHN TAMANG
BIM 7th semester

> " *You have to show up in the World Cup, and in the World Cup anything can happen.*
>
> –Lionel Messi "

Football has always been more than just a sport for me, it's a way of life. Football has always been a significant part of who I am. This article reflects my journey with football, a journey filled with passion, dedication, and countless unforgettable moments.

THE EARLY DAYS

My love affair with football began when I was a little kid. I remember the first jersey I wore, Argentine jersey set and a boot when I was in grade 7 which my mom bought. That feeling of excitement as I chased the ball across the field. I was not allowed to play in the ground as the ground was overtaken by seniors. I used to be a ball boy outside the ground to collect out kicked balls. I had a brother, Sonam whom I followed to the ground. Sometimes he used to take me to watch his tournament and match games. He used to bring the match ball home, that's where I used to get my chance to play.

Later, me and my local friends made a team, Future Star Football Club. Playing as a goalkeeper, I won my first tournament with this team. Even though I didn't have techniques to play the game, but I had energy and pure passion for this beautiful game. I lifted my first trophy in the first tournament I played. Those early days were filled with pure joy, playing for hours until the sun went down. It was during these moments that I fell in love with the game.

MEMORABLE MOMENTS

Football has given me countless memorable moments. So many happy as well as frustrating and heart-breaking moments. From proud winning moments to sad and devastating moments when not being able to perform well. Winning a local tournament with my team was another highlight, a testament to our hard work and dedication. As I used to live in a hostel, I wasn't allowed to go outside to play. I used to jump off the fence early in the morning before anyone woke up, making sure no one stopped me from playing. Countless punishments for doing so. Spending whole night dreaming of how to play tomorrow. One of the best moments in my football life is wearing a jersey, printed Prime College in the front and my name on the back wearing a captain band. I feel so proud when I think of these moments. These moments are etched in my memory, reminding me why I love this game so much.

Football has taught me many valuable life lessons. It has instilled in me a sense of discipline, as regular training requires commitment and effort. The sport has also taught me resilience, as bouncing back from a loss or an injury requires mental toughness. Most importantly, football has given me a sense of belonging and community, connecting me with people who share the same passion. The best part of football is that the moment I enter the pitch, I am a different me. I forget the whole world. Ball on the feet gives me joy that I find nowhere else. I am the most passionate football player and a football fan you will ever meet. Every sprained ankle, sprained fingers, uncountable wounds, and scratches is enough to prove my love for this game. Going out for every challenge and giving the remaining last of the whole me, I won't really regret dying on the field.

Football has shaped who I am, and I am grateful for every moment spent on the pitch. I don't think the love for football will ever get less.

Football is more than just a game to me, it's a lifelong passion. It's my healthy addiction. From my early days of playing in the fields to playing with A-division players, football has been a constant source of joy, learning, and growth. It has taught me valuable life skills and given me countless cherished memories. As I continue my journey, football will always hold a special place in my heart.

1. Prime Sewa : Volunteer Management System

PrimeSewa is a new initiative at Prime College designed to streamline and enhance the volunteering process for students. This system focuses on six unique clubs within the college community, providing a central hub for students to find volunteer opportunities, access club-related information, connect with each other, and make donations. PrimeSewa allows Prime students to register for an account using a registration form and subsequently login using their registered username and password. Once logged in, students can volunteer for events and become donors. The system is developed using HTML, CSS, Bootstrap, JavaScript, JQuery, PHP, and MySQL. The system includes an admin dashboard accessible only to authorized personnel. The admin dashboard allows administrators to view logged-in volunteer requests and interested donor data, process requests, and manage the database. Upon processing a request, users receive an email notification regarding acceptance or rejection. Furthermore, the admin can set volunteering limits for specific months to ensure equal opportunities for all students. The system also facilitates online donations for students to contribute easily through Khalti payment.

Keywords: HTML, Volunteer, Donation, Payment Gateway, Mail

- Nirjala Shakya

2. BuildMe : Resume Builder

The "BuildMe: Résumé Builder project simplifies resume creation for job seekers by offering an intuitive platform that generates tailored resumes based on individual skills and goals. With a user-friendly interface and customizable templates, users can quickly craft professional, visually appealing résumé s. JavaScript enhances interactivity by providing real-time feedback, while PHP and MySQL ensure robust backend support for efficient data management. Key features include keyword optimization, which helps users incorporate industry- specific terms to improve visibility in applicant tracking systems, and formatting advice to maintain a professional appearance. Additionally, the platform includes email integration, allowing admins to seamlessly send messages directly to users. By providing tools that enhance résumé quality, "BuildMe: Résumé Builder" aims to revolutionize the job application process, helping users effectively showcase their abilities and increase their chances of securing job opportunities. Through advanced technology and thoughtful design, "BuildMe" supports job seekers in achieving their career goals.

THANK YOU

As we conclude the fourth edition of Vrittanta:, we would like to extend our heartfelt and deepest gratitude to everyone who contributed to the success of this newsletter. Thank you for your honesty. The stories you've shared have been heartwarming, inspiring, unsettling, and even shocking at times. We appreciate that you've trusted us enough to share the truth, even when it isn't "pretty." It is truly an honor for us to have your stories with us. The continued encouragement and enthusiasm from everyone made it possible to deliver informative and engaging content.

We want to convey our sincere appreciation and regard for the continued support and trust of our readers. Your faith in us is greatly appreciated, and such support is the essence of our newsletter. We would also like to express our utmost respect and deepest gratitude to our **Ethics and Standard Officer (ESO)** and the **Marketing, Public Relations & Event (MPRE) Department of Prime College** who guided us throughout. Special appreciation goes to each member of the incredible editorial team who has brought this newsletter to life through their dedication, passion, and hard work.

We look forward to more stories, art, and creativity in the future. The fourth edition has set a high standard for the future, and we are confident that the future team will surpass it. We aim to be a free space with infinite possibilities for every perspective on art and stories. We hope to bring forth such diverse and unique perspectives of art to our readers. Team Vrittanta has tried its best to convey the sentiments of such infinite possibilities through the submitted articles.

To those who make a difference with every click – thank you for being changemakers. Special mention to **Luniva Gorkhali, Prabisha Maharjan, and Saleena Shrestha (BBA 4th), Subha Thapa (BBM 5th), Bijita Pokhrel, Bishal B.R. Devkota, Sujita Manandhar, Ujjan Tandukar, and Wanshika Shrestha (BBA 7th), Anil Dangol and Dixika Shrestha (BIM 7th), Rubika Shakya, Rubina Shakya, and Rusha Napit (BBA 8th), Angelique Singh Dangol (BBM 8th),** for their dedication and effort in bringing "Vrittanta:" to life. Your efforts have made a significant impact, and it shows. In every click and interaction, we see a glimpse of our shared future.
